# Pro M

## Washing and dryi

### Washing in the conveyor tunnel system

#### Convincing advantages:

- ▲ Extremely light, very smooth running due to minimal water absorption
- ▲ Dirt-repellent equipment
- ▲ Significantly less wear (engines, gear units etc.) due to significantly reduced mass movement
- ▲ Guaranteed runtime in roll-overs up to 30.000 washings
- ▲ Guaranteed runtime in conveyor tunnel system up to 60.000 washings

### Washing in the rollover

#### Additional benefit, which increases return and reduces costs:

- ▲ Highest brand recognition of the „microfiber“ as optimal cleaning material
- ▲ Optimum image and advertising effect
- ▲ Reduced wear, lower energy demand, cost reduction

# Micro ng with ProMicro

## Drying with mitter and rotating system

- ▲ High water absorption capacity
- ▲ Fast material drying
- ▲ Maximum efficiency due to long service life
- ▲ Easy mounting and dismounting
- ▲ Drying equipment can be washed in all commercially available washing machines
- ▲ Available in the colours red and blue
- ▲ Gentle on paint drying results with glossy effect
- ▲ Drying stripes with active exchange system to double the capacity of drying

## Drying with side roller drying system

## Drying with roof roller drying system

# Quick and easiest installation with unique carrier systems of ProMicro
